

Please follow the below steps to access the environment through VPN

First step :-

Please access to the below link

<https://aka.ms/MFASetup>

note: please **sign out** from your Account if you sign in before like the example
(Ahmed.Yousif@google.com)

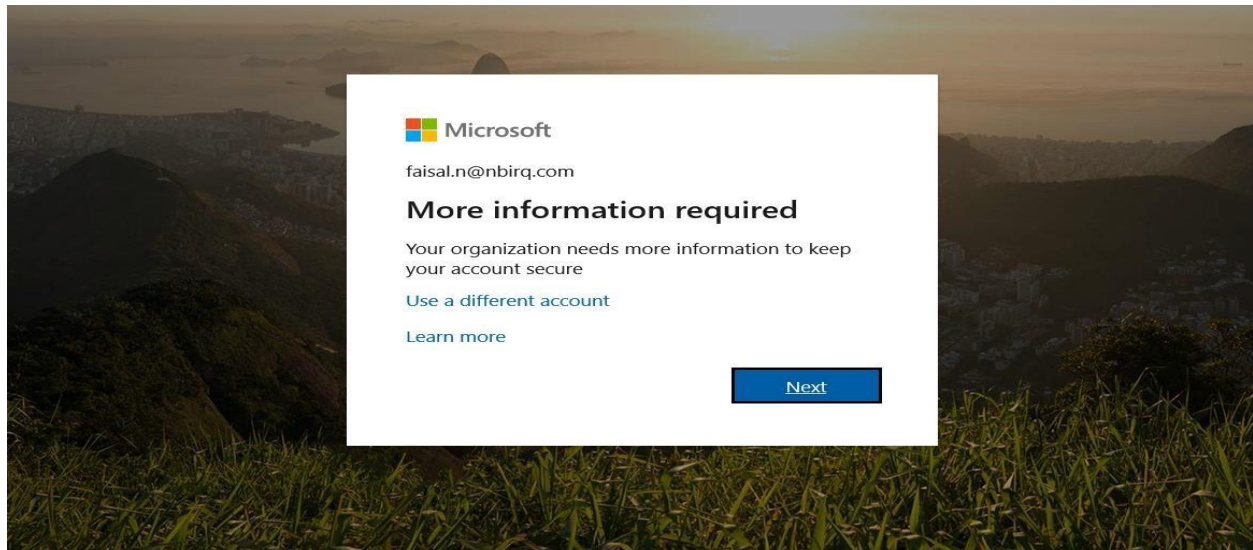

The screenshot shows the Microsoft account security verification page. At the top left is the Microsoft logo. At the top right, there is a user profile icon and a "Sign out" button, which is highlighted with a red rectangular box. Below the header, the main heading is "Additional security verification". Underneath, there is a sub-heading "Secure your account by adding phone verification to your password. View video to know how to secure your account". The main section is titled "Step 1: How should we contact you?". It contains a dropdown menu labeled "Authentication phone" with a value of "7-111-1111". Below this is a text input field for the phone number, which is partially obscured by a black redaction box. Further down, there is a "Method" section with a radio button selected for "Send me a code by text message". At the bottom right, there is a blue "Next" button. At the bottom left, there is a disclaimer box that reads: "Your phone numbers will only be used for account security. Standard telephone and SMS charges will apply."

Second Step:-

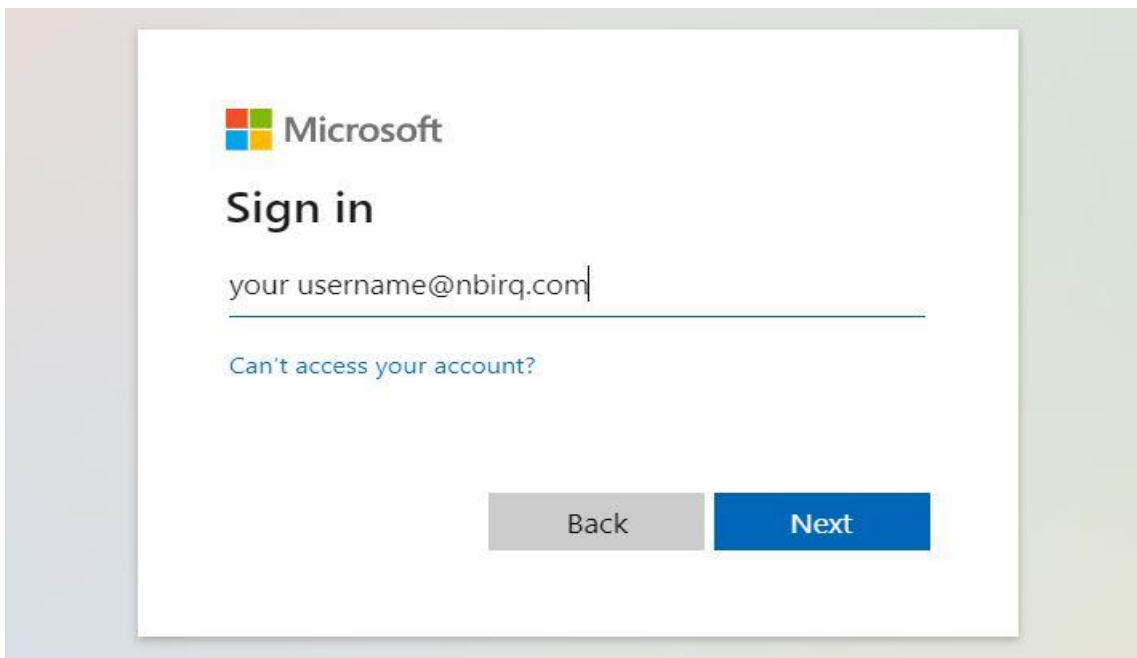

When you open the link please press on the below:

Use a different account

Third Step :-

Please write your username as in the following example:

Fourth step :-

Please write your phone number as below screen attached with choosing:

Send me a code by test message

Additional security verification

Secure your account by adding phone verification to your password. [View video to know how to secure your account](#)

Step 1: How should we contact you?

Authentication phone 

Iraq (+964)  7708703900

Method

Send me a code by text message

Next

Your phone numbers will only be used for account security. Standard telephone and SMS charges will apply.

Fifth Step :-

After you write verification code and select verify.. now select ☒ (Authenticator app or token) and then select save

Microsoft

Additional security verification

When you sign in with your password, you are also required to respond from a registered device. This makes it harder for a hacker to sign in with just a stolen password.
[View video to know how to secure your account](#)

what's your preferred option?

We'll use this verification option by default.

Text code to my authentication p ▾

how would you like to respond?

Set up one or more of these options. [Learn more](#)

☒ Authentication phone * [redacted] [redacted]

☒ Authenticator app or Token [Set up Authenticator app](#)

Select here first

[Save](#) **and then select Save**

Your phone numbers will only be used for account security. Standard telephone and SMS charges will apply.

sixth Step :-

when the profile created as the below screen show move to manual number 2
(entry process)
